

A) Learning data

|          | e  | $\neg e$ |
|----------|----|----------|
| c        | 10 | 10       |
| $\neg c$ | 4  | 16       |

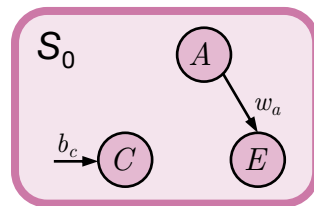

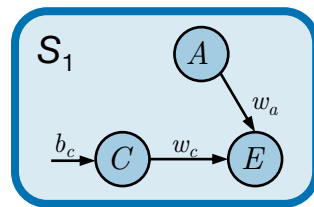

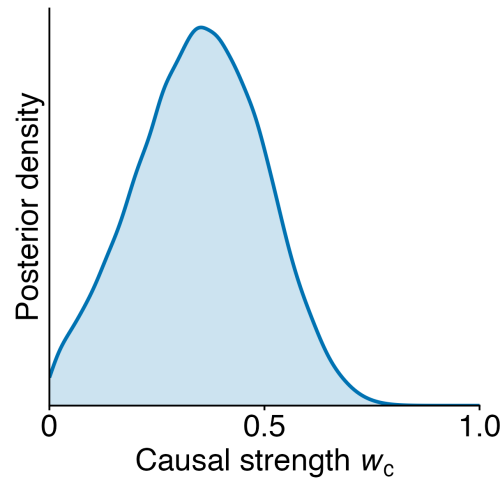

$P(e|c)$   0.50

$P(e|\neg c)$   0.20

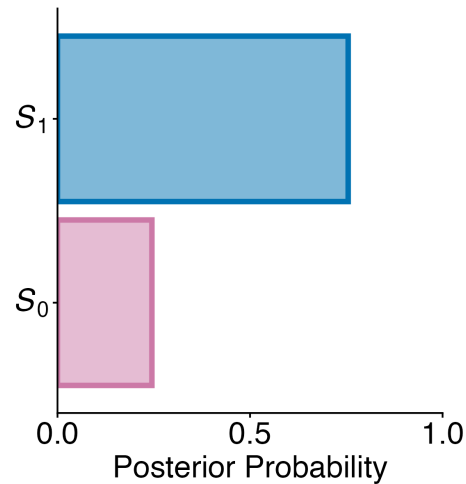

$\Delta P$   0.30

power  0.37

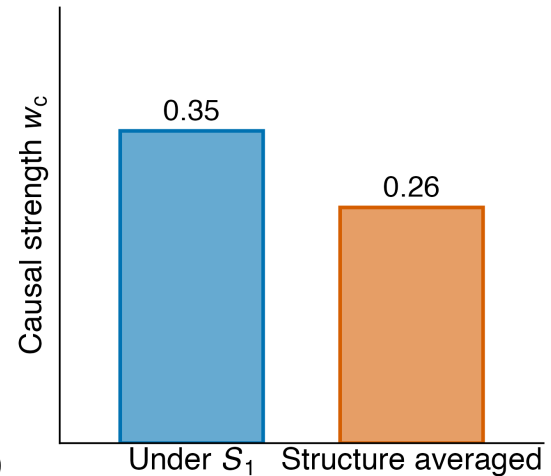

B) Causal structures

C) Causal Strength under  $S_1$ 

D) Structure posteriors

E) Causal strength

$P(\theta|D; S_i)$

$P(S_i|D)$

$\mathbb{E}[w_c | D]$

Structure hypotheses

Estimate parameters and structure posteriors

Bayesian model averaging
